COVER DESCRIPTIONS

Premiflex Ultra

- » The Forté Premiflex Ultra Breathe Cover builds on the attributes of the Premiflex range and delivers superior infection control and overall mattress longevity. Acute care environments often result in prolonged exposure to high humidity and moisture as result of reduced mattress rest periods and higher utilisation. Premiflex Ultra Breathe technology increases the ability of the cover to allow moisture to escape and consequently reducing condensation and formation of contaminants within the cover. Benefits of this include less risk of mould developing and greater foam performance.

Advantiflex Classic

- » The Advantiflex Classic cover is a tried and proven medical grade pressure care cover suited for use in all healthcare settings. Utilising raw materials unique to Forté Healthcare and produced in Belgium, the Advantiflex Classic Cover offers excellent value, compliance, infection control, performance, and patient care.
- » Pressure Injury Prevention is delivered through Bi-directional Stretch qualities and Moisture Vapour Permeability. Standard features include High Frequency Sealed and Welded Seams, Soft-Touch Polyurethane Upper and Heavy-Duty PVC Base.

Luxury Quilted Homecare

- » The Luxury Quilted Homecare Cover is an open weave, breathable pressure care cover which looks and feels comparable to a luxury conventional residential mattress. The 4-Way Stretch, Anti-Shearing, conforming open weave fabric compliments the multi-tiered foam structure offering Pressure Redistribution, Immersion, and Envelopment.
- » High breathability to aid in microclimate control, encourages air circulation which promotes health micro-climate conditions at the skin interface and provides cooler comfort important for hot sleepers.

Soft Touch Ultra PVC

- » The Soft Touch Ultra PVC cover is a 100% waterproof, durable PVC material manufactured using a casting process. This provides a soft, 'polyurethane type' durable finish.
- » This cover is designed for high demanding patient care scenarios from inpatient mental health to group home care.
- » The Soft Touch Ultra PVC high performing cover is designed as a damage resistant, waterproof cover. It only offers limited pressure care.

Heavy-Duty PVC

- » The Heavy-Duty PVC cover is manufactured with a 100% waterproof, durable PVC material.
- » This cover is designed for high demanding patient care scenarios from inpatient mental health to group home care.
- » This Heavy-Duty PVC cover is designed as a damage resistant cover and does not offer pressure care.

CUSTOM OPTIONS AVAILABLE.
Manufactured to order.

COVER SPECIFICATIONS

- » Custom made to your requirements, Forté medical covers utilise premium quality raw materials sourced from leading manufacturers such as Sioen Industries (Belgium) and Dartex Coatings (UK).
- » Understanding the complex interaction between the medical cover and support surface function is crucial to a successful outcome. Forté ensure the properties of the medical covers we manufacture perfectly compliment the pressure care and comfort aspects to the support surface and exceed care requirements.
- » Forté medical covers address medical requirements such as Interface Pressure Relief, Shear Reduction, Microclimate Management, Durability and Infection Control.
- » Our state-of-the art manufacturing facility in Armidale, New England incorporates High Frequency Welding capability, Advanced Sewing Machinery and Digital Branding.
- » We specialise in custom made requirements, from 1 cover to 1000, we have the expertise to fulfil your requirements competitively and on-time.
- » Fully sealed and enclosed antigligature construction methods available for mental health applications.
