

OFFLOADING PRESSURE IN THE HIGH RISK AREA

- ▲ For completely offloading of the rectal area
- ▲ Adjustable non-contact area
- ▲ Stable positioning

The Vicair Centre Relief O2 consists of 5 individual compartments, designed to contour under loading. Each compartment is designed to influence a specific area of the pelvis, striking a unique balance between preserving skin and underlying tissue at the ischials, coccyx and trochanters, positioning the pelvis and supporting the femurs. The unique feature is the circular compartment towards the rear of the cushion. Designed especially for (partial) offloading of the coccyx/rectal area. For specific needs the filling of each of the 5 compartments can be easily adjusted, for individuals who: (1) require (partial) offloading of the rectal area, (2) have coccyx problems, (3) have localized deep pressure injuries.

PRODUCT PERFORMANCE

Skin protection / Anti decubitus

Pressure redistribution	▲▲▲▲▲
Shear force reduction	▲▲▲▲△
Microclimate control	▲▲▲▲▲
Impact & vibration damping	▲▲▲▲▲

Positioning
